

NOTICE TO MEMBERS

Further Precautionary Measures for Novel Coronavirus (COVID-19)

In view of the continued outbreak of COVID-19 cases in China, Hong Kong and other affected countries (Japan, South Korea and Italy) we take this opportunity to advise you of additional measures being undertaken at the Club to protect the health of Members, Guests and Staff.

We have implemented a deep cleaning schedule that our overnight Housekeeping team are undertaking on a day to day basis. They are using special disinfection cleaning products and will continue to deep clean all areas of the Club per the schedule for as long as required. During opening hours, apart from the containment measures already being taken, the Housekeeping team have further increased the frequency of cleaning to all public areas, in particular door handles and all lift areas.

Whilst sanitising dispensers are located in key locations throughout the Club members and guests are asked that they hand sanitise on entry to the Club at the time they are temperature tested by a Staff member.

As previously advised Members will note that Government is recommending that anyone who has recently visited Mainland China should consider remaining at home for a period of 14 days. At the same time, a member showing signs of a respiratory illness should seek medical advice and look to stay at home. Whilst the Club would not want to make this mandatory (within the Club) we trust that all members and guests of members will take this as a duty of care and will therefore take the responsible view. Staff members have also been strongly advised not to travel to Mainland China and, if they do so, they will be subject to 14 days mandatory quarantine at home.

We appreciate the understanding and cooperation of members and are sure that you understand the need for increased vigilance and attention to hygiene at this time. There is no mandatory policy for members or guests to wear masks in the Club but if concerned, please do look to keep a safe social distance from others while you are here.

We will look to keep you updated of any further developments but, if you require to directly contact the Centre for Health Protection for health updates and health tips then you can do so at www.chp.gov.hk.
